

RONAK CHAVHAN

Computer Science Student | Software Developer | Backend Enthusiast

ronakchavhan89@gmail.com | 9967595336 | Navi Mumbai, India | linkedin.com/in/ronak-chavhan-b3343a32b | github.com/Ronak-uh

SUMMARY

Computer Science engineering student specializing in full-stack software development, debugging, and gamifying web interfaces. Strong programming foundation with a passion for building immersive, interactive applications, scalable design, and creative problem solving.

INTERNSHIP / WORK EXPERIENCE

Co-Founder

Student Food Venture

- Launched and ran a small culinary venture with a partner, owning marketing, supplier and partner communication, profit-sharing, and financial tracking
- Recovered the full initial capital investment and closed the venture profitable

PROJECTS

Nexus-PR-Auditor

AI-Driven Code Review Microservice

- Developed a multi-agent swarm using the Google Gen AI SDK to asynchronously audit algorithmic complexity and scan for security vulnerabilities
- Engineered a secure Node.js webhook pipeline integrated with the GitHub REST API and MongoDB to automate and track deterministic review verdicts

MapBorne

Indian Transport Accessibility

- Improved route processing efficiency by 30% via optimized API calls
- Reduced data fetch delay by ~40% through Firebase sync optimization

Unravel

Automated Blog Publishing

- Reduced manual publishing effort by ~60% through workflow automation
- Lowered error rate by ~50% in repeated posting cycles

SKILLS

Languages: C++, Python, JavaScript, SQL, HTML, CSS

Frameworks: React, Node.js, Express.js, MediaPipe, OpenCV

Data & Cloud: MongoDB, SQL, Firebase, AWS, Google Gen AI SDK

Tools: Git, GitHub, Docker, DevOps, Figma, Canva

Additional: Debugging, APIs & REST, Webhooks, CI/CD Pipelines, Git Version Control, Database Ops, Testing

Soft Skills: Communication, Collaboration, Problem Solving, Teamwork

ACHIEVEMENTS

- **Hardware Repair & Maintenance:** Independently diagnose and repair laptop hardware, including LCD panel replacements and thermal system servicing (thermal paste reapplication).

- Hackathon Competitor & AI Prototyper: Competed in multiple hackathons, using multi-agent frameworks and Google Gemini models to build AI-driven prototypes under tight time constraints.

EDUCATION

ITM Skills University

Bachelor of Technology in Computer Science Engineering

2024 – 2028

INTERESTS

App Development, Gaming, Reading
