SUMMARY

Computer Science engineering student focused on software development, debugging, and efficient application building. Strong programming foundation with a growing interest in backend systems, scalable design, and creative problem solving.

PROJECTS

MapBorne - Indian Transport Accessibility

Interactive platform with time based route analysis.

- Improved route processing efficiency by 30% via optimized API calls.
- Reduced data fetch delay by ~40% through Firebase sync optimization.

Unravel - Automated Blog Publishing

Automated publishing pipeline with audit tracking.

- Reduced manual publishing effort by ~60% through workflow automation.
- Lowered error rate by ~50% in repeated posting cycles.

EDUCATION

B.Tech Computer Science Engineering

ITM Skills University

2024 - 2028

Higher Secondary Education (HSC)

St. Wilfred School

2023 - 2024

ADDITIONAL SKILLS

Debugging, APIs & REST, Git Version Control, Database Ops, Testing

KEY ACHIEVEMENTS

Hackathon Participant

Competed in multiple hackathons, building deployable solutions under 24-72 hour time constraints.

Efficiency Expert

Optimized API calls in MapBorne improving efficiency by 30%.

Automation Builder

Reduced manual efforts by 60% in Unravel via workflow automation.

TECH STACK

C++, Python, HTML, CSS, JavaScript, React, Node.js, Express.js, SQL, MongoDB, Firebase, Figma, Canva, AWS, DevOps, Git, GitHub, Docker, MediaPip, OpenCV

SOFT SKILLS

Communication, Collaboration, Problem Solving, Teamwork

INTERESTS

App Development
Gaming
